

Dear Students

The purpose of this application is to ask your troubles or problems to the other users where you can constraint your range for spread. And users of that range will give you solutions and their suggestions.

1. Go to "settings" select "unknown source" then Install this android application,
2. Before registering the app..
3. After login "follow" the users from "search" for better communication.

Go to settings-> apps -> Troubleshoot-> give all the 4 permissions.

This app is built by Preeti Kumari pursuing MCA from NIT calicut. As end semester project work. This app needs realtime users for better understanding. Your cooperation will be highly appreciated.
